registering components; and

transferring at least a portion of the registration information to each of the plurality of registration databases via the plurality of connections, wherein the establishing a plurality of connections comprises:

#### **REASONS FOR ALLOWANCE**

3. Claims 1-13, 15-42 are allowed.

4. The following is an examiner's statement of reasons for allowance.

Claims 1, 8, 18, 19, 23, 28, and 29 claimed a system and method of unified collection and uploading of user registration information for manufactures of components of client computer is documented by the cited prior arts. However, the invention has some particular combination limitations that are different and distinct from prior arts. Among the differences between claimed invention and the prior art of record, the major difference is the combination of collecting registration for manufactures for a plurality of registering components of the client computer; establishing a communication link between the client computer and a network; establishing a plurality of connections between the client computer and plurality of registration databases corresponding to manufactures of the plurality of registering components via the same communication link (or via the single communication link) transferring at least a portion of the

registration information to each of the plurality of registration databases via the plurality of connection via a single communication is novel thus the invention is patentable.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
